

ProductData

Wax - Dispersion Bee's Milk (138)

Koster Keunen, LLC

Waxes of Superior Quality Since 1852

Authorized Distributor:

Description:

Bee's Milk is an all-natural dispersion of Beeswax in water. Bee's Milk makes it possible to 'Cold Formulate'. A formulator is able to get the benefits of beeswax in a formulation without having to heat that phase of the formula.

The lipid composition in the Bee's Milk mimics that of

the natural lipid composition of the skin, thus copying the skin's own natural secretions, proving that Bee's Milk is nature's emollient.

Bee's Milk is stabilized, and is compatible with surfactants and other compounds of high ionic strength.

Note: Specific product application recommendations are available on request.

TYPICAL PROPERTIES:

Formulating Advantages:

- Cold Formulating
- Water, Glycol, and Alcohol Dispersible
- Ease of Handling
- Film Former / Barrier
- Emollient
- Highly Stable
- Opacifier
- Enhances Skin Feel

Uses:

- Skin Care Formulations
- Sun Care
- Shampoos, and Conditioners
- Spray, Pumps, and Aerosols
- Pads and Pre-moistened Towellets

Regulatory:

CTFA / INCI Name: Beeswax, Sesame Oil, Lecithin, Methyl Paraben, and Water

CAS #: 8012-89-3, 8008-74-0, 8002-43-5, 99-76-3, and 65-85-0

Toxicological Data: No Irritation Potential
