

Wacker-Belsil® CDM 3526 VP

C26 – 28 Alkyl Dimethicone

Characteristics

Wacker-Belsil® CDM 3526 VP is a cream coloured, pasty polymethylsiloxane that is resistant to hydrolysis and has a very high affinity to all kinds of substrates.

Application

The main applications of this silicone paste is in skin protection, skin care, sunscreens and decorative cosmetics.

In skin care products, it improves the formulation efficiency and provides a soft, non-sticky skin feel. The Wacker-Belsil® CDM 3526 VP forms an occlusive film, which reduces trans-epidermal water loss (TEWL). Its good spreading properties improve distribution of the preparation.

It's high substantivity, improved water resistance and moisturizing properties make this alkyl-functional silicone paste an indispensable component of sunscreen products and decorative cosmetics, such as lipsticks, mascara and make-up.

Storage

Wacker-Belsil® CDM 3526 VP has a shelf life of at least 12 months when stored at roomtemperature in the tightly closed original container. The 'Best use before end' date of each batch appears on the product label.

Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

Product data

Properties	Unit	Wacker-Belsil® CDM 3526 VP
Appearance		pasty
Colour		cream coloured
Melting Point	[°C]	35 +/- 5
INCI name		C26 – 28 Alkyl Dimethicone

These figures are intended as a guide and should not be used in preparing specifications.

Chemical structure

Safety information

Detailed safety information is contained in each material safety data sheet, which can be obtained from our sales offices.
