

Wacker-Belsil® DM 1 000 000

Dimethicone

Characteristics

Wacker-Belsil® DM 1 000 000 is a linear, non-reactive, unmodified polydimethylsiloxane with a viscosity of 1 000 000 mm²/s.

Wacker-Belsil DM 1 000 000 is characterized by low surface tension and a high spreading coefficient. Due to its flexible polymer backbone, dimethicones have high permeability to gases (e.g., water vapor, oxygen), which allows respiration of the skin.

Applications

High viscosity Wacker-Belsil DM 1 000 000 is widely used in a highly varied range of personal care formulations.

Dimethicones provide a hydrophobic, protective, but breathable barrier to the skin, imparting softness and emolliency. They improve spreading characteristics, enhance luster, and prevent stickiness in skin care as well as in color cosmetics compositions.

Storage

Wacker-Belsil DM 1 000 000 has a shelf life of at least 12 months when stored at room temperature in the tightly closed original container. The 'Best use before end' date of each batch appears on the product label.

Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required

for the intended use must be checked for quality assurance reasons.

Safety information

Detailed safety information is contained in each material data safety sheet, which can be obtained from our sales offices.

Product data

Properties	Characteristics
Appearance	Clear, colorless
Surface tension at 25°C, approx., [mN/m]	21.6
Viscosity, approx., [mm ² /s]	1 000 000
Solidifying point, DIN 51 794, [°C]	-40
Density at 25°C, approx., [g/cm ³]	0.97
Flash point, ISO 2592, [°C]	>320
Refractive index at 25°C, approx.	1.4037
INCI name	Dimethicone

Additional Information

Solubility

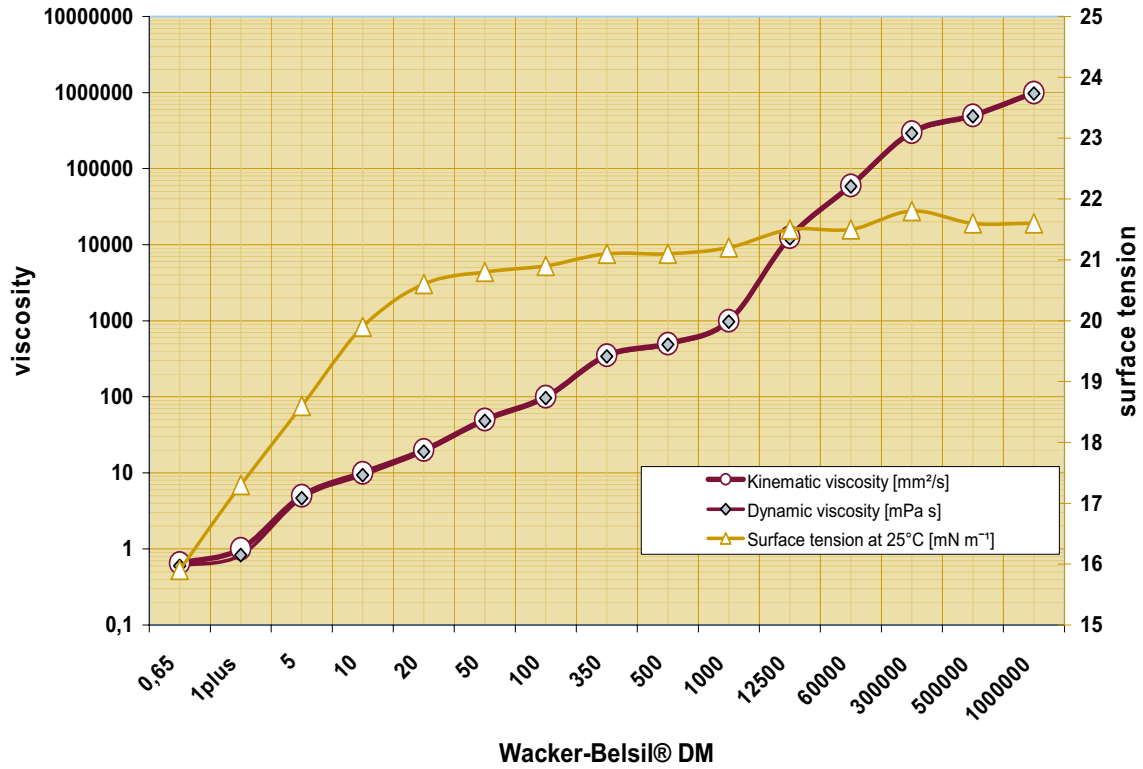

Ingredient	Wacker-Belsil DM 1 000 000	Ingredient	Wacker-Belsil DM 1 000 000
